SAUMYA PRASAD

Data Analyst

+ 1 (737) 342-8053 | New York, US | saumya.prasad460@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Data Analyst and Business Analyst skilled in Python, SQL, DAX, Power BI, Tableau, and Excel. Experienced in data modeling, ETL, semantic modeling, and BI dashboarding, translating business needs into actionable insights. Proficient in requirements elicitation, Agile workflows, and process optimization using Miro, Visio, GitHub, and JIRA to support data-driven decision-making

SKILLS

- **Database & Analytics:** Python, SQL, DAX, MySQL, Oracle, BigQuery, Snowflake
- **Reporting & BI tools**: PowerBI, Tableau, Excel (Power Query, Pivot Tables, VBA)
- **Cloud technologies**: AWS Redshift, Azure, Google Cloud Platform (BigQuery)
- **Automation & AI Tools**: n8n.io, Power Automate, Power Apps, Base44, Zapier, Claude AI
- **Tools & Collaboration**: Git/GitHub, JIRA, Confluence, Agile, Scrum, Kanban Boards, Visio, Miro

EXPERIENCE

Business Analyst | *Saayam for All (Remote)* *Sep 2025 - Present*

- Conducted requirements elicitation through stakeholder interviews, workshops, and surveys; translated business needs into measurable KPIs, BRDs, TRDs, and user stories in JIRA aligned with strategic objectives
- Facilitated Agile ceremonies including sprint planning, backlog grooming, and UAT sessions; wrote detailed test cases and validated BI and system solutions against acceptance criteria
- Designed process workflows, system diagrams, and visual models using Miro and Visio to communicate complex business processes, identify gaps, and recommend improvements
- Managed documentation and version control of BA artifacts using GitHub, ensuring collaboration, and consistency across projects

Data Analyst | *California State University Long Beach | Long Beach, CA* *Mar 2024 - May 2024*

- Designed and maintained SharePoint sites/pages, centralizing team resources and improving information accessibility
- Developed low-code applications using Microsoft Power Apps and automated workflows with Power Automate, increasing operational efficiency by 10%
- Built advanced Excel reports using Pivot Tables, XLOOKUP/VLOOKUP, conditional formatting, and Power Query to clean, analyze, and visualize data for decision-making
- Developed 3+ business intelligence dashboards in Power BI using SQL and Excel data sources to track KPIs and deliver actionable insights

PROJECTS

Netflix Recommendation System | *Python, Pandas, Streamlit, EDA, Predictive modeling*

- Built an end-to-end interactive data visualization dashboard merging primary survey and Kaggle data to surface streaming KPIs and business analytics insights, supporting data-driven decision-making across 1,000+ data points
- Developed dual recommendation systems using content-based and context-based filtering with data science and predictive modeling techniques, managed full Agile lifecycle via Azure Boards with user stories, sprint planning, and project charter

Gender based Wage Gap Analysis, Loyola Marymount Datathon | *Power BI, Power Query, Data Analysis*

- Analyzed 25K+ ACS Census records using Python and Power Query; applied EDA, DAX measures, feature engineering, and regression analysis to build predictive data models and identify key variables, quantifying a 26.4% gender-based wage gap
- Delivered an interactive Power BI dashboard with DAX powered KPIs to communicate business analytics findings and wage disparity insights to panel judges

UPS Logistics Inventory System - Database Management System | *DBMS, SQL, Data Modeling*

- Designed an end-to-end MySQL database using EERD principles, integrating JSON and XML data sources and developing complex SQL queries to automate operational reporting and streamline logistics inventory workflows
- Created dimensional and fact tables data models improving query performance by 40%, enabling self-serve business analytics, data visualization, and data-driven decision-making capabilities for cross-functional business users

EDUCATION

Master of Science, Information Systems*,* California State University Long Beach | Aug 2023 - May 2025

GPA: 3.6 | Coursework: Business Analytics, Data Analysis, Data Modeling, Database Management, Statistics, Machine Learning, Data Science, AI

Bachelor of Engineering, Information Technology, University of Mumbai, India | Aug 2019 - May 2023
